

ELDAN Rasps 807/1207

ELDAN Rasps 807/1207

Sophisticated manufacturing solutions will facilitate easy maintenance and reduce downtime.....

Standard rotor is made from wear-resistant, steel

The main rotor housing is equipped with replaceable wear plates to increase the durability of the machine.

Special tool-steel knives can be reground multiple times on a »flat-bed« grinder to ensure long life and low operating costs.

Adjustable knife clearance.

Serrated knife design available in different steel qualities.

Wedge mounted flying knives.
Screens available with different hole sizes.

Hydraulic opening of rotor housing for easy access to rotor and knives.

Friction clutches protects the drive system from momentary overload.

Reliable After-Sales-Service.

Ideal solution for preparing for instance cables for granulation
